PROFESSIONAL SUMMARY

"QA Automation Engineer with 5 years of hands-on experience in **UI, API**, and Backend Testing across enterprise projects at Accenture. Skilled in **Playwright (TS/JS)**, **Selenium (Java)**, **Postman**, and **Playwright API** automation using **VS Code**. Adept at integrating automated test suites into **CI/CD pipelines** via **Jenkins** and **Azure DevOps**, and actively utilizing **GitHub Copilot** for AI-assisted test script development. Well-versed in **POM frameworks**, **BDD/Cucumber**, **SQL** validation, **Shell scripting**, and **Agile** delivery — with a strong focus on test coverage, reliability, and early defect detection."

KEY ACHIEVEMENTS

- Architected a **Playwright + TypeScript POM framework** from scratch across 3+ modules, reducing script maintenance by ~30%.
- Delivered 115+ automated test cases (**Shell, Java-Selenium, E2E**), significantly cutting **regression** cycle time.
- Built and executed **API test** scripts using **Postman** and **Playwright API**, expanding coverage from **UI** to backend services.
- Integrated **CI/CD pipelines** in **Jenkins** and **Azure DevOps**, enabling same-day **defect detection** on every build.
- Developed **100+ HP-UFT/VBScript** test cases, consistently delivering 3+ automated cases per sprint.
- Configured **Allure Reports** and **Azure** Test Plans for real-time test health and sprint quality visibility.
- Leveraged **GitHub Copilot** for AI-assisted scripting, improving development speed and code consistency.

PROFESSIONAL EXPERIENCE

Automation Test Engineer — Accenture

Jan 2023 – Present

Domain: Banking/Enterprise Applications | Tools: Playwright, Selenium, Azure DevOps, Jenkins, Git

- Designed and developed automated test scripts using **Playwright with TypeScript**, achieving end-to-end test coverage with a **Page Object Model (POM) framework** for better maintainability and scalability.
- Built and maintained 25+ end-to-end Playwright test cases and **50+ Java-Selenium** regression scripts, reducing manual regression effort across each release cycle.
- Implemented parallel test execution and integrated automated test runs into **CI/CD pipelines (Jenkins & GitHub Actions)**, enabling continuous validation on every code push.
- Configured and maintained **Azure DevOps CI/CD pipelines** to automate Playwright test execution, build validation, and multi-environment deployments.
- Created and maintained test plans, test suites, and automated test runs in Azure Test Plans, ensuring full traceability and alignment with **Agile sprint cycles**.
- Developed and implemented **40+ Shell script** test cases for backend validation and configured **Allure reports** for clear, actionable test result visualization.
- Designed **automation framework** from scratch for order placement and integrated operations; managed all scripts through Git for version control and team collaboration.
- Designed and configured **Control-M job** schedules to automate report generation and validation workflows, improving operational efficiency.
- Conducted SQL-based database validation and prepared detailed test summary reports for stakeholder review post each release.
- Hands-on experience in **API** test automation using **Playwright**, including writing and executing automated API test scripts to **validate endpoints, response codes, and data integrity**.

Automation Test Engineer — Accenture

Aug 2021 – Dec 2022

Domain: Telecom Services | Tools: HP-UFT, VBScript, Jenkins, ALM, Cucumber

- Developed, maintained, and executed 100+ automated test cases using **HP-UFT with VBScript** across multiple sprints, consistently delivering 3+ new automated cases per sprint.
- Performed Regression, PLT, Unit, and End-to-End testing, identifying critical defects early and ensuring application reliability before production releases.
- Created reusable **VBScript functions** and libraries within the **UFT framework** to enhance automation efficiency, reduce code duplication, and streamline test execution control.
- Managed test data for **Cucumber/BDD** scenarios using Excel and CSV, enabling robust data-driven testing across multiple functional workflows.
- Utilized **ALM** for **defect tracking** and **Jenkins** for **CI/CD**, enabling unattended overnight test execution and faster turnaround on defect resolution.
- Collaborated closely with developers across all Agile ceremonies (**standups, sprint planning, retrospectives**) to resolve blockers and ensure sprint success.

TECHNICAL SKILLS

Automation Tools	: Playwright (TS/JS), Selenium (Java), HP-UFT (VBScript)
Frameworks	: BDD, Cucumber, Page Object Model (POM), Data-Driven Testing
Languages	: TypeScript, JavaScript, Java, VBScript, Shell Scripting, SQL
CI/CD & DevOps	: Jenkins, Azure DevOps Pipelines, GitHub Actions, Git
Test Management	: Azure Test Plans, JIRA, HP ALM
Reporting & Others	: Allure Reports, Control-M, VS Code, UNIX Commands
Methodologies	: Agile (Scrum), SDLC, STLC

Education

Bachelor of Information Technology	2021
DKTE Society's Textile & Engineering Institute, Ichalkaranji CGPA: 7.9	
Diploma in Computer Science	2018
Sharad Institute of Technology Polytechnic, Yadrav 80%
